9004UELED	PS24WUEFLED

Important: LED headlights not for sale in the USA; sold in Canada only.

Up to **6500 K** white light

Troubleshooting tip: Some vehicle CANbus systems have specific challenges with LED-based retrofit bulbs. They see the lower power consumption of LED bulbs as a sign of a burned-out bulb, which can cause dashboard warnings, high beam indications, or LED flickering.

Installing a Philips LED CANbus adapter is the ideal supplement for LED headlight bulbs. These unique Philips CANbus adapters ensure smooth functioning for any electrical issues. The adapter's waterproof connectors provide optimal performance in all conditions. Installation is easy and takes only minutes.
